

Compliance checklist

18/37

Every requirement from the subject PDF, checked against the current state of the repository.

REQUIRED ITEMS DONE

0 – done X – not done

#	REQUIREMENT	STATUS	NOTE
III.1 – General Rules			
1	Python 3.10+	0	running 3.12.6
2	flake8 clean	X	flake8 not installed, unverified
3	mypy clean (required flags)	X	maze_generator.py:165 arg-type error
4	Graceful exception handling, never crashes	X	FileNotFoundError, OffsetError uncaught
5	Context managers for file/resource handling	0	with open(...) throughout
6	Type hints on params, returns, variables	0	present across all modules
7	Docstrings (PEP 257) on functions/classes	X	none written yet
III.2 – Makefile			
8	install / run / debug / clean / lint rules	X	no Makefile in repo
III.3 – Additional Guidelines			
9	Test suite (pytest / unittest)	X	none found
10	.gitignore excludes Python artifacts	0	__pycache__, *.pyc, .mypy_cache
IV.3 – Configuration File			
11	Mandatory keys parsed & validated	0	validate_and_build.py
12	# comment lines ignored	0	parser.py
13	Default config.txt committed to repo	0	tracked, clean
IV.4 – Maze Requirements			
14	Seeded, reproducible randomness	0	random.Random(seed_value)

15	Entry/exit valid, distinct, in bounds	0	validate_entry_exit
16	Full connectivity, no isolated cells except 42	0	recheck once #22 is fixed
17	Walls closed at external borders	0	guaranteed by construction
18	Coherent shared walls between neighbours	0	output_validator.py confirms
19	No corridor wider than 2 cells	X	open_corridor_check() written, not wired in
20	Visible "42" pattern of closed cells	0	forty_two()
21	"42" omitted + console message if maze too small	X	currently raises uncaught OffsetError
22	"42" pattern checked against entry/exit overlap	X	no collision check yet
23	PERFECT flag → exactly one path	0	braid_maze() gated correctly
IV.5 – Output File Format			
24	One hex digit per cell, one row per line	0	output_generator.py
25	Entry & exit coordinates written	0	after blank line
26	Shortest path (N/E/S/W) as third line	X	no pathfinding implemented
27	All lines end with \n	X	exit line missing trailing newline
V – Visual Representation			
28	ASCII or MLX rendering of the maze	0	maze_display.py
29	Entry/exit shown in the visual	X	not marked
30	Solution path shown in the visual	X	blocked on #26
31	Interaction — regenerate maze	X	static, one-shot script
32	Interaction — show/hide path	X	not implemented
33	Interaction — change wall colours	X	not implemented
VI – Code Reusability			
34	Generator as standalone importable class	0	MazeGen

35	Usage docs — instantiate, params, access solution	X	not written
36	Pip-installable mazegen-* package at repo root	X	no pyproject.toml, no build yet
VII — README			
37	README.md with all required sections	X	file doesn't exist
VIII — Bonuses (<i>optional, not counted above</i>)			
38	Multiple maze generation algorithms	X	optional
39	Animation during generation	X	optional

Audited against subject v2.1 · mypy run with the subject's required flags · flake8 unverified (not installed)
